Maintenance & service

WHO WE ARE

Engineering, industrial supply and technical support in one combined profile.

Nepal Enterprises Pvt. Ltd. and KEM Engineering & Suppliers bring together industrial machinery supply, electrical engineering, automation and practical technical services for industrial buyers in Nepal.

Our combined scope supports the equipment lifecycle: sourcing machinery and components, installing and integrating systems, commissioning equipment, maintaining assets and responding to technical problems. Each requirement can be discussed with the appropriate company to define the scope of supply and service.

NEPAL ENTERPRISES PVT. LTD.

Bharatpur - 04, Chitwan, Nepal

Machinery, equipment & industrial supply

Nepal Enterprises Pvt. Ltd. supports buyers with industrial machinery, technical equipment, electrical and electronic products, automation systems, spare parts and related engineering services.

Our business scope

SOURCING & DISTRIBUTION

Import, purchase, sales and distribution of machinery, technical equipment and supporting industrial products.

ENGINEERING & AUTOMATION

System design, programming, installation, commissioning, operation support, training, maintenance and repair.

PRODUCTION SUPPORT

Production-line design and establishment, machinery upgrades and capacity-enhancement support.

SPECIALIST SUPPLY

Pharmaceutical, medical and surgical equipment and materials; laboratory equipment and chemicals.

Additional supply areas

Construction-related machinery and materials, industrial and household goods where permitted, and participation in machinery and equipment exhibitions, seminars and technical events.

Electrical control enclosure | Illustrative image

SOLUTIONS & SUPPLY

Equipment and components selected around the customer's technical requirements.

Drives, switchgear & electrical control components | Illustrative image

01 INDUSTRIAL MACHINERY

Machinery, technical equipment and accessories for industrial production applications.

02 AUTOMATION SYSTEMS

PLC, HMI, VFD and SCADA equipment, with programming and system-design support.

03 ELECTRICAL SYSTEMS

Motors, generators, transformers, panel boards, voltage stabilizers and distribution equipment.

04 PRODUCTION LINES

Equipment for line establishment, upgrades and capacity-enhancement requirements.

05 SPARE PARTS

Machinery spares, accessories and supporting components for operation and maintenance.

06 CONSTRUCTION & MATERIALS

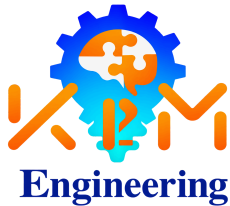

Construction-related machinery, equipment and technical materials.

Discuss your specification

Share the equipment type, application, capacity, electrical supply and required components to help define the appropriate supply scope.

KEM ENGINEERING & SUPPLIERS

Gaidakot-8, Nawalpur, Nepal

Engineering support for industrial operations

KEM Engineering & Suppliers provides electrical, automation, mechanical, installation, maintenance and industrial support services to a range of industries.

Mechanical maintenance & equipment servicing | Illustrative image

INSTALL & INTEGRATE

Machine installation, electrical systems, control panels and automation integration.

MAINTAIN & SUPPORT

Preventive maintenance, breakdown troubleshooting, spare parts and technical consultancy.

Practical technical service

From an individual electrical fault to a machine installation requirement, KEM focuses on understanding the application and defining the work needed to support reliable operation.

OUR ENGINEERING SERVICES

Technical services for installation, operation and maintenance.

Electrical Installation & Maintenance

Installation and maintenance support for industrial electrical systems and connected equipment.

Industrial Automation & Control Systems

Integration and servicing of machine and process controls to suit operating requirements.

PLC, HMI & VFD Services

Programming, configuration and troubleshooting support for controllers, operator interfaces and drives.

Electrical Panel Design & Manufacturing

Design and manufacture of electrical panels around the required control and distribution functions.

Preventive & Breakdown Maintenance

Planned maintenance and fault-response support for industrial equipment and systems.

Machine Installation & Commissioning

Installation support, functional checks and commissioning assistance for machinery.

Instrumentation & Control

Support for field instruments, signals and the controls used to monitor industrial processes.

Spare Parts Supply

Supply support for machinery, electrical and automation components required for servicing.

Technical Consultancy

Technical discussion and practical guidance on equipment, controls and maintenance requirements.

Industrial Electrical Troubleshooting

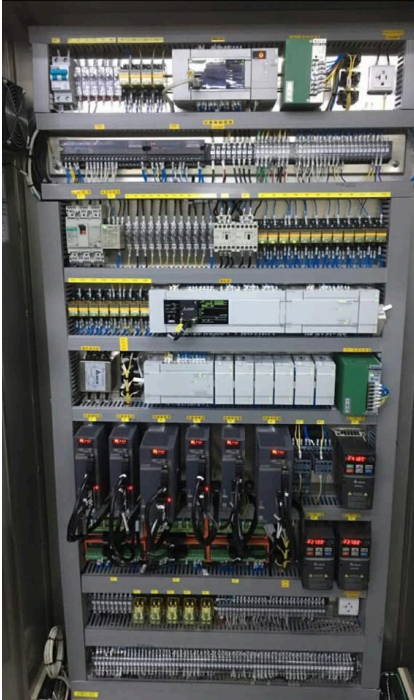

Investigation of electrical faults to identify corrective work and support restoration of operation.

Electrical panel & operator interface | Illustrative image

INDUSTRIAL AUTOMATION & CONTROL

Connect field devices, controls, operator interfaces and machinery.

PLC

Programmable Logic Controller
Machine logic and control sequences.

HMI

Human Machine Interface
Operator interaction and machine status.

VFD

Variable Frequency Drive
Motor-speed control for the application.

SCADA

Supervisory Control and Data Acquisition
Supervision, monitoring and data visibility.

Automation cabinet | Illustrative image

How the control system connects

SENSORS / FIELD DEVICES → PLC / CONTROLLER

PLC / CONTROLLER ↔ HMI / SCADA

PLC / CONTROLLER → VFD / MOTOR / MACHINE

PROCESS MONITORING & CONTROL

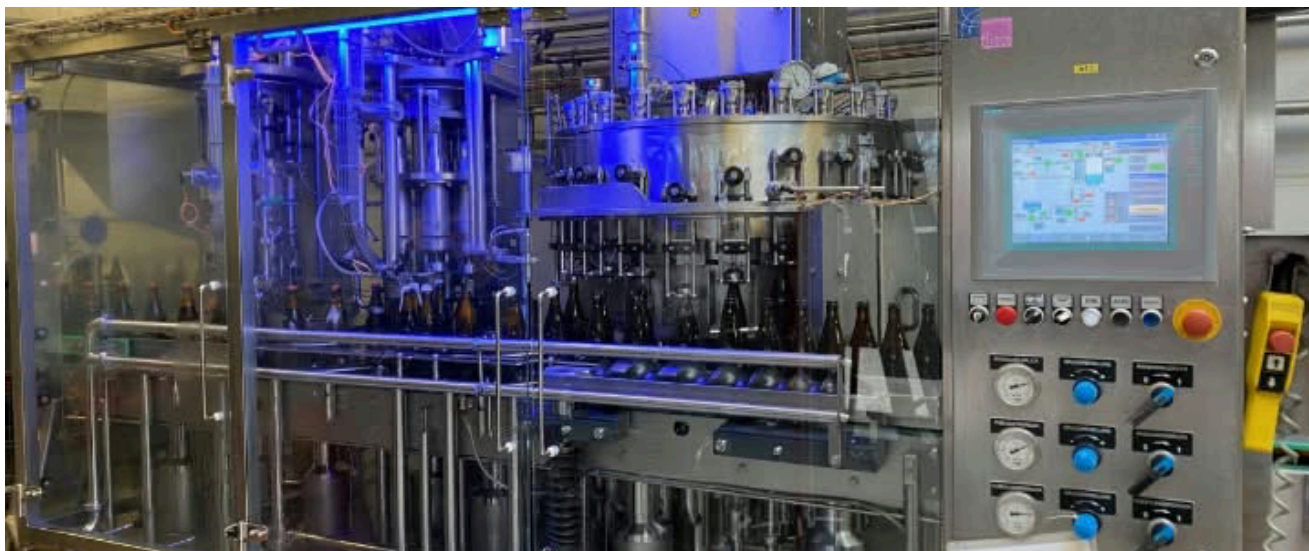

Controllers read field signals and command equipment. HMI and SCADA systems provide operator visibility and interaction; field feedback supports monitoring and control.

Service scope

Instrumentation and control • Electrical control panels • System troubleshooting • Machine automation • Programming and commissioning

INDUSTRIES & APPLICATIONS

KEM Engineering & Suppliers supports the following industrial applications.

Beverage machinery & production control | Illustrative image

01 BREWERY & BEVERAGE

Electrical, automation and maintenance support for beverage processing and production equipment.

02 FOOD & MANUFACTURING

Machine installation, controls and technical support for production operations.

03 PACKAGING LINES

Electrical and automation services for packaging machinery and line equipment.

04 UTILITY & PROCESS SYSTEMS

Instrumentation, controls and electrical support for utility and process applications.

05 INDUSTRIAL ELECTRICAL SYSTEMS

Installation, panel solutions, maintenance and fault investigation.

06 AUTOMATION & INSTRUMENTATION

Controller, interface, drive and field-instrument integration and support.

Application requirements guide the scope

Equipment condition, process needs and site requirements help determine the appropriate technical approach.

INDUSTRIAL MACHINERY & EQUIPMENT SOLUTIONS

Supply, integration and service support across key equipment categories.

MOTORS & ELECTRICAL EQUIPMENT

Equipment and service coverage

Industrial machinery • Production lines • Electrical equipment • Automation equipment • Control panels • Motors and drives • Instrumentation • Spare parts • Installation support • Maintenance support

Share equipment details

A machine nameplate, part number, photograph or technical specification can help identify the equipment and components required.

FROM SUPPLY TO AFTER-SALES TECHNICAL SUPPORT

A practical sequence for defining and delivering the required scope.

01	Requirement Assessment Understand the application, equipment and operating need.
02	Technical Consultation Discuss technical requirements and site conditions.
03	Equipment / Component Selection Identify suitable equipment and component specifications.
04	Supply & Procurement Arrange the agreed machinery, equipment and components.
05	Installation Position, connect and prepare equipment for integration.
06	Electrical & Automation Integration Connect electrical systems, instruments and controls.
07	Testing & Commissioning Check functions and support equipment start-up.
08	Operator / Technical Support Provide operating guidance and technical assistance.
09	Preventive Maintenance Plan maintenance around equipment and operating needs.
10	Troubleshooting & Breakdown Support Investigate faults and define corrective work.

Services, responsibilities and schedules are defined for each requirement.

MISSION, VISION & VALUES

Practical engineering. Professional service. A focus on the customer's operation.

OUR MISSION

To provide reliable, safe, and cost-effective engineering solutions with quality workmanship and timely service.

OUR VISION

To become a trusted engineering and industrial service partner in Nepal by delivering quality solutions and professional technical support.

Our values

QUALITY

Dependable workmanship and practical engineering solutions.

RELIABILITY

Responsive and consistent technical support.

SAFETY

Safety-focused working practices in industrial environments.

PROFESSIONALISM

Clear communication and professional technical support.

EFFICIENCY

Practical solutions aligned with operational requirements and cost effectiveness.

WHY WORK WITH US

Technical service shaped around the work your equipment needs.

Industrial equipment maintenance | Illustrative image

EXPERIENCED TECHNICAL TEAM

Practical technical knowledge supports installation, automation, maintenance and fault investigation.

FAST RESPONSE & RELIABLE SERVICE

Responsive communication helps establish priorities and coordinate the required technical work.

QUALITY-FOCUSED WORKMANSHIP

Attention to installation, connections and functional checks supports dependable workmanship.

COMPETITIVE PRICING

Scope-based quotations help buyers assess the required work and associated costs.

PROFESSIONAL TECHNICAL SUPPORT

Clear discussion of requirements and practical guidance support equipment decisions and operation.

SAFETY-FOCUSED WORKING PRACTICES

Attention to site conditions and safe working practices is part of the engineering approach.

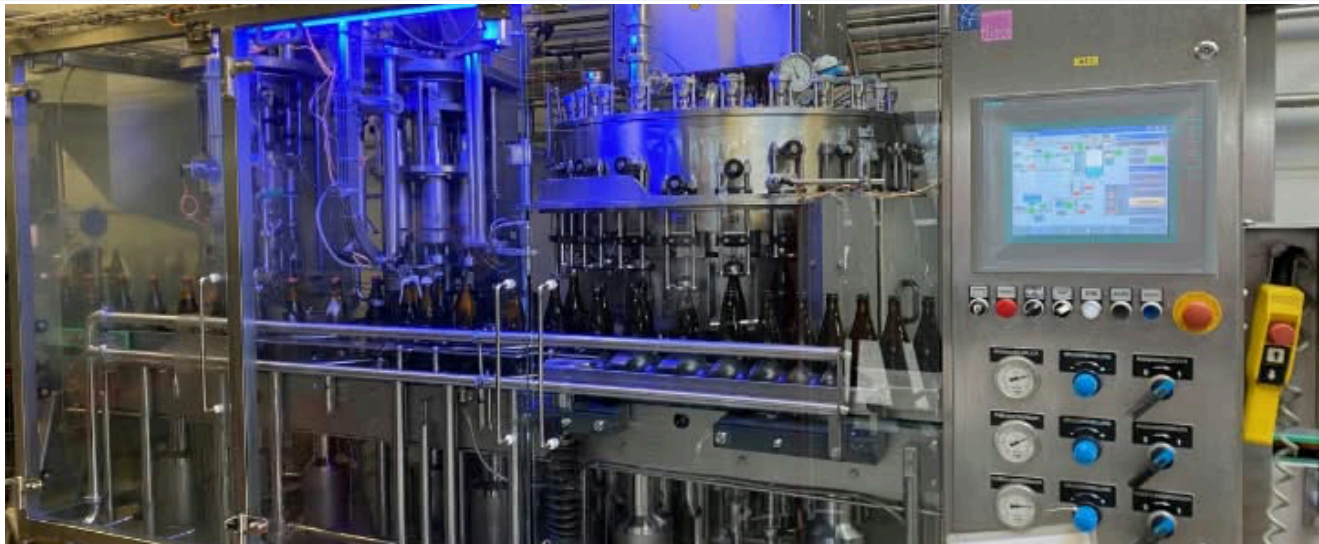

Start with a clear requirement

Tell us what you need to install, improve, source or repair. We can discuss the technical scope and the next steps.

CAPABILITIES AT A GLANCE

A combined view of engineering, automation, service and supply.

AREA	CAPABILITY SCOPE
ENGINEERING	Electrical • Mechanical support • Instrumentation • Technical consultancy
AUTOMATION	PLC • HMI • VFD • SCADA • Control systems
INDUSTRIAL SERVICES	Installation • Commissioning • Preventive maintenance • Breakdown maintenance • Troubleshooting
SUPPLY	Electrical equipment with All type of Panel Board • Automation components • Spare parts • Industrial components • Machinery
PRODUCTION SUPPORT	Production lines • Machine upgrades • Control integration • Capacity-enhancement support

Production-line machinery & operator controls | Illustrative image

From component to system

Requirements may involve a single replacement component, a machine-control upgrade or installation and maintenance support. The final scope is matched to the equipment and application.

OUR VALUED CUSTOMERS

We appreciate the trust of our customers and the opportunity to support their requirements.
